Flo-Master Warranty

Flo-Master guarantees, unconditionally, each power unit 100% against defects in electrical components, materials, and workmanship for a period of 18 months for the M31, M55, and M72, and three years for the other Flo-Master units from date of purchase. Should any electrical part become defective, Flo-Master will repair or replace it free of charge. This warranty applies only to power units in residential use and does not include installation, accessory parts, or paper filter bags. For warranty work, all power units must be returned, freight prepaid, to Flo-Master or serviced by an authorized Flo-Master Service Center. Damage from misuse, abuse or unauthorized repairs will void this warranty.

Flo-Master further covers its products with a Lifetime Warranty against defects in materials and workmanship. In the event an authorized dealer is not nearby, Flo-Master will honor and perform all warranty and/or warranty extension services for a nominal charge, provided the power unit is returned to the factory, freight prepaid. This warranty does not apply to commercial applications, misuse, abuse, or if the unit has been worked on by an unauthorized person.

About M.D. Manufacturing, Inc.

Based in Bakersfield, California, M.D. Manufacturing, Inc. was founded in 1961 as a family owned and operated business. We do not claim to be the largest manufacturer of built-in vacuum units, but we strive in being unsurpassed by any other manufacturer in quality and engineering design. Our continuing goal is to maintain the high standard of quality and design that has made M.D. Manufacturing the leader in the central vacuum industry. To assure you that this is no idle boast, we encourage you to compare Flo-Master central vacuum units with any other central vacuum unit - regardless of price. Once you've made the comparison you'll understand why we say, "When a better unit is built, it will be built by M.D. Manufacturing, Inc. in the USA".

FLO-MASTER

Built-In Vacuum Systems

The Affordable Necessity

Now you can afford the very best.

TIME

Time

It has been said that time is the new currency of the 21st century. Today's active homeowner has to balance so many different activities that any opportunity to save time can be a life saver. Since you have better things to do, the Flo-Master built in vacuum system makes maintaining your home as quick and easy as possible.

Power Saves Time

The Flo-Master power unit delivers no less than twice – and as much as five times – the power of conventional portables. This extra power makes clean up jobs or regular maintenance fast and easy. Spend less time vacuuming while still doing a better job!

The Convenience of Versatility

Plugging in the lightweight hose at any conveniently located outlet and turning the Flo-Master on gives you the flexibility to clean all types of floor or carpet, stairways, ceilings, corners, drapes, crevices and furniture.

The full line of Flo-Master units feature 20-gauge power-coated steel, Ametek motors, and dual intakes.

MONEY

Money

After all is said and done, we all have to keep an eye on the bottom line. M.D. Manufacturing has over forty years experience working with customers just like you, so we know exactly what you need in a central home vacuum system. The Flo-Master built in vacuum system offers the unique combination of a relatively low initial investment, high added value, and consistently low maintenance costs.

Low Cost Means High Value

A Flo-Master system is far more affordable than you may think, particularly when you consider the value it immediately adds to your home. Couple that with its greater life expectancy as compared to portables – and the added life of your carpets and home furnishings – and you have a recipe for success.

Lower Maintenance Saves Money

Because Flo-Master's trash capacity is many times that of conventional portables, it only needs to be emptied 2 to 3 times a year. With no other maintenance needed and a warranty of 3 to 5 years, you can be assured of incredibly low maintenance and repair costs.

The M55 Flo-Master units are compact and ready to powerfully clean smaller homes while staying "hidden".

COMFORT

Comfort

What makes a house a home? Everyone wants to feel safe, secure and comfortable when at home with the family. Whatever the costs involved, this is one area of life where today's homeowner rightly refuses to compromise. The Flo-Master built in vacuum system can bring a new level of comfort and peace to your home, even working to maintain the healthiest environment possible for your family.

Healthy Home, Happy Home

By locating the Flo-Master power unit outside the living area, all germ-laden air is exhausted outside – not recirculated throughout your home as with portable vacuum units. Pet dander, dust mites, and pollens have no opportunity to bother your family; leading many allergists to recommend central vacuum systems.

Indoor Ear Quality

Another benefit of placing the Flo-Master power unit outside your home is peace and quiet cleaning. No more loud, irritating noises normally associated with cleaning your home.
